Priya Sharma

Data Scientist

priya.sharma@example.com | (415) 555-0102 | Seattle, WA

Summary

Data scientist with 6 years of experience turning messy data into decisions. Builds forecasting and churn models in python 3 (pandas, scikit-learn, statsmodels) and explains results to non-technical stakeholders.

Skills

python 3, pandas, scikit-learn, statsmodels, SQL (Snowflake, BigQuery), Tableau, A/B testing, causal inference, Airflow

Experience

Senior Data Scientist - Cobalt Health Labs (2022 - Present)

- Built a patient no-show prediction model (AUC 0.87) that reduced missed appointments by 18%.
- Designed A/B tests for the reminder service and automated weekly KPI reports with Airflow.

Data Analyst, then Data Scientist - Harborview Retail (2019 - 2022)

- Forecast demand for 3,000 products with gradient-boosted models, reducing stock-outs by 12%.
- Created Tableau dashboards used every week by more than 200 store managers.

Education

- M.S. Statistics, Lakeshore Institute of Technology, 2019
- B.Sc. Mathematics, Riverside State University, 2017

Publications and Talks

- Forecasting retail demand with hierarchical models - Regional Data Science Meetup, 2023.
- Practical causal inference for product teams - internal workshop series, 2024.

Volunteering

- Teaches a free introductory statistics workshop at a community centre.
